

## Ph.D. Student Opportunity – Animal Metabolic Physiology

Department of Animal Science  
College of Agriculture and Life Sciences  
University of Vermont

The Department of Animal Science at the University of Vermont is looking for a Ph.D. student in Animal Metabolic Physiology. The student will engage in research in regulation of glucose production and utilization in dairy cattle.

The candidate should have excellent academic records with a background in animal science, nutrition, physiology, molecular/cellular biology, endocrinology, or related field. A Master's degree is preferred, but not required. He/she must be highly self-motivated and have a good work ethic. Working experience with large animals, or lab animals is highly desirable.

The student will be supported by a graduate teaching assistantship. So, excellent communication skills are essential. For foreign students, a minimum of TOEFL score of 100 (in 120) is required.

Interested candidates should contact **Dr. Feng-Qi Zhao** at [fzhao@uvm.edu](mailto:fzhao@uvm.edu) with your statement of interest, academic transcripts, GRE scores, and curriculum vitae for further considerations.

Founded in 1791, UVM is consistently ranked as one of the top public universities in the USA. The University is located in Burlington, Vermont, also rated as one of the best small cities in America. The greater Burlington area has a population of about 125,000 and enjoys a panoramic setting on the shores of Lake Champlain, between the Green Mountains of Vermont and the Adirondack Mountains of New York. Burlington and the surrounding area provide an environment rich in cultural and recreational activities for individuals and families, with multiple opportunities for interactions with local industry and communities.

The University of Vermont is an Affirmative action/equal opportunity employer
