

Internship at Larson Farm

Rich Larson has a 30-cow Jersey herd in Wells, VT and has obtained a SARE grant to test the efficacy of foliar application of molybdenum on pastures. He is looking for a student interested in working on his farm this summer to assist with the project as an intern. He is looking to attract a bright, energetic student committed to forage-based dairy. This has great potential to give direction to someone looking for a very real-world research experience that has the potential to make a significant impact on the northeast grazing industry.

Please call Rich if you have any questions.

Larson Farm
661 South Street
Wells, Vermont 05774
802-645-0865

(If seeking UVM credit, please see ASCI Internship Coordinator Fran Kinghorn before beginning this internship.)
