The production response and feed efficiency of lactating Holstein cows to the incorporation of brown midrib corn silage or a leafy corn hybrid silage with improved NDF and starch digestibility

Student: Kaitlin Benoit
Advisors: Sara Morrison, Katie Ballard, and Maggie Carter

The chewing behavior response of lactating Holstein cows to the incorporation of brown midrib corn silage or a leafy corn hybrid silage with improved NDF and starch digestibility

Student: Melissa Woolpert
Advisors: Sarah Morrison and Katie Ballard

Validation of the ai24 SCR HR-Tag for use in dairy research trials to quantify rumination behavior in dairy cattle

Student: Andrew Whitney
Advisors: Heather Dann, Heather Gauthier

Evaluation of yeast culture supplements on lactational performance and feed efficiency of Holstein dairy cattle

Students: Morgen Doane
Advisors: Heather Dann, Maggie Carter

Do yeast culture supplements alter rumen dynamics of high producing Holstein dairy cattle?

Student: Cassie Bromley
Advisors: Heather Dann, Heather Gauthier
